Re: *BellSouth Telecommunications, Inc.'s Entry Into Long Distance  
(InterLATA) Service in Tennessee Pursuant to Section 271 of the  
Telecommunications Act of 1996*  
Docket No. 97-00309

Dear Mr. Waddell:

Enclosed are the original and thirteen copies of the supplemental responses of BellSouth Telecommunications, Inc. to the Second Data Request of NEXTLINK. A copy has been provided to counsel of record.

Very truly yours,

Guy M. Hicks

GMH:ch

Enclosure

**REQUEST:** Your response to NEXTLINK Data Request No. 5 states that BellSouth is not aware of any documents relating to complaints by NEXTLINK regarding BellSouth's failure to provide directory listings in a timely manner. Attached to these data requests as Exhibit 1 are examples of such complaints that were produced by BellSouth in response to other data requests. Please produce all other such documents. Also, please produce all documents relating to requests by NEXTLINK for white or yellow pages directory listings for its customers and to actions taken by BellSouth or on BellSouth's behalf in response to NEXTLINK's requests. This includes, but is not limited to, NEXTLINK's requests and all records of communications regarding such requests between BellSouth and BellSouth Advertising and Publication Corp. ("BAPCO").

**RESPONSE:** NEXTLINK's First Set of Data Requests Item No. 5 requested documentation regarding white page listings data. BellSouth responded that they were not aware of any such documents. NEXTLINK Exhibit 1 referred to in this request involved the directory assistance database. For documentation regarding NEXTLINK complaints generally, see BellSouth's responses to NEXTLINK's Request Nos. 44, 49, 50, and 51.

Regarding NEXTLINK's request for documents for white or yellow page directory listings, BAPCO does not receive directly any requests for listings from NEXTLINK. Such requests are made through the LCSC in the form of service orders created by NEXTLINK on the DLR. The LCSC sends order information to BAPCO for the publishing of the white and yellow pages. Because such orders are not retained by the carrier, it would be unduly burdensome for BAPCO to search for such orders. BAPCO can print for NEXTLINK review pages for NEXTLINK customer listings, if specific directories are identified. This print out would show all NEXTLINK listings for that directory area which have been received by BAPCO.

Item No. 62  
Supplemental Response  
Page 1 of 1

REQUEST: Refer to the February 10, 1998 letter and attachment from Donna Hartley to Greg Breetz produced in response to NEXTLINK Data Request No. 2. Please state why there were no technicians available to work the January 28, 1998 cutover referenced in that document. Also, please provide all time sheets, call out sheets and other documents listing or describing work actually performed or scheduled to be performed by technicians assigned to the Nashville Airport Central Office on January 28, 1998. If no technicians were assigned to that office, please state why no technicians were assigned.

RESPONSE: The normal work loading procedure followed by the Nashville work center outside normal business hours, is to assign a "rover" technician to a group of central offices based on expected workload. On January 28, 1998 a single technician was assigned to work cutovers for NEXTLINK at both the Nashville Donelson and Airport central offices. The Donelson cutover was scheduled for 5:00pm and the Airport cutover was scheduled for 6:00pm. Due to a loading error on the Donelson cutover, adequate time was not allocated to complete the cutover in time to start the Airport cutover by 6:00pm. In addition, a circuit failure occurred which generated a maintenance request. Normal procedures give a higher priority to repairing circuit failures than to provisioning new service. The work required to repair this failure further delayed the technician's arrival at the Airport central office.

Attached is the load and time record.

March 6, 1998  
Item No. 93  
Supplemental Response  
Page 1 of 1

**REQUEST:** Please describe the engineering design of the loops serving Century 2 Staffing, 30 Burton Hills, Nashville, Tennessee, 37215, and produce engineering design layouts or other documents from which the identity of the central office and any remote switch serving those loops can be determined.

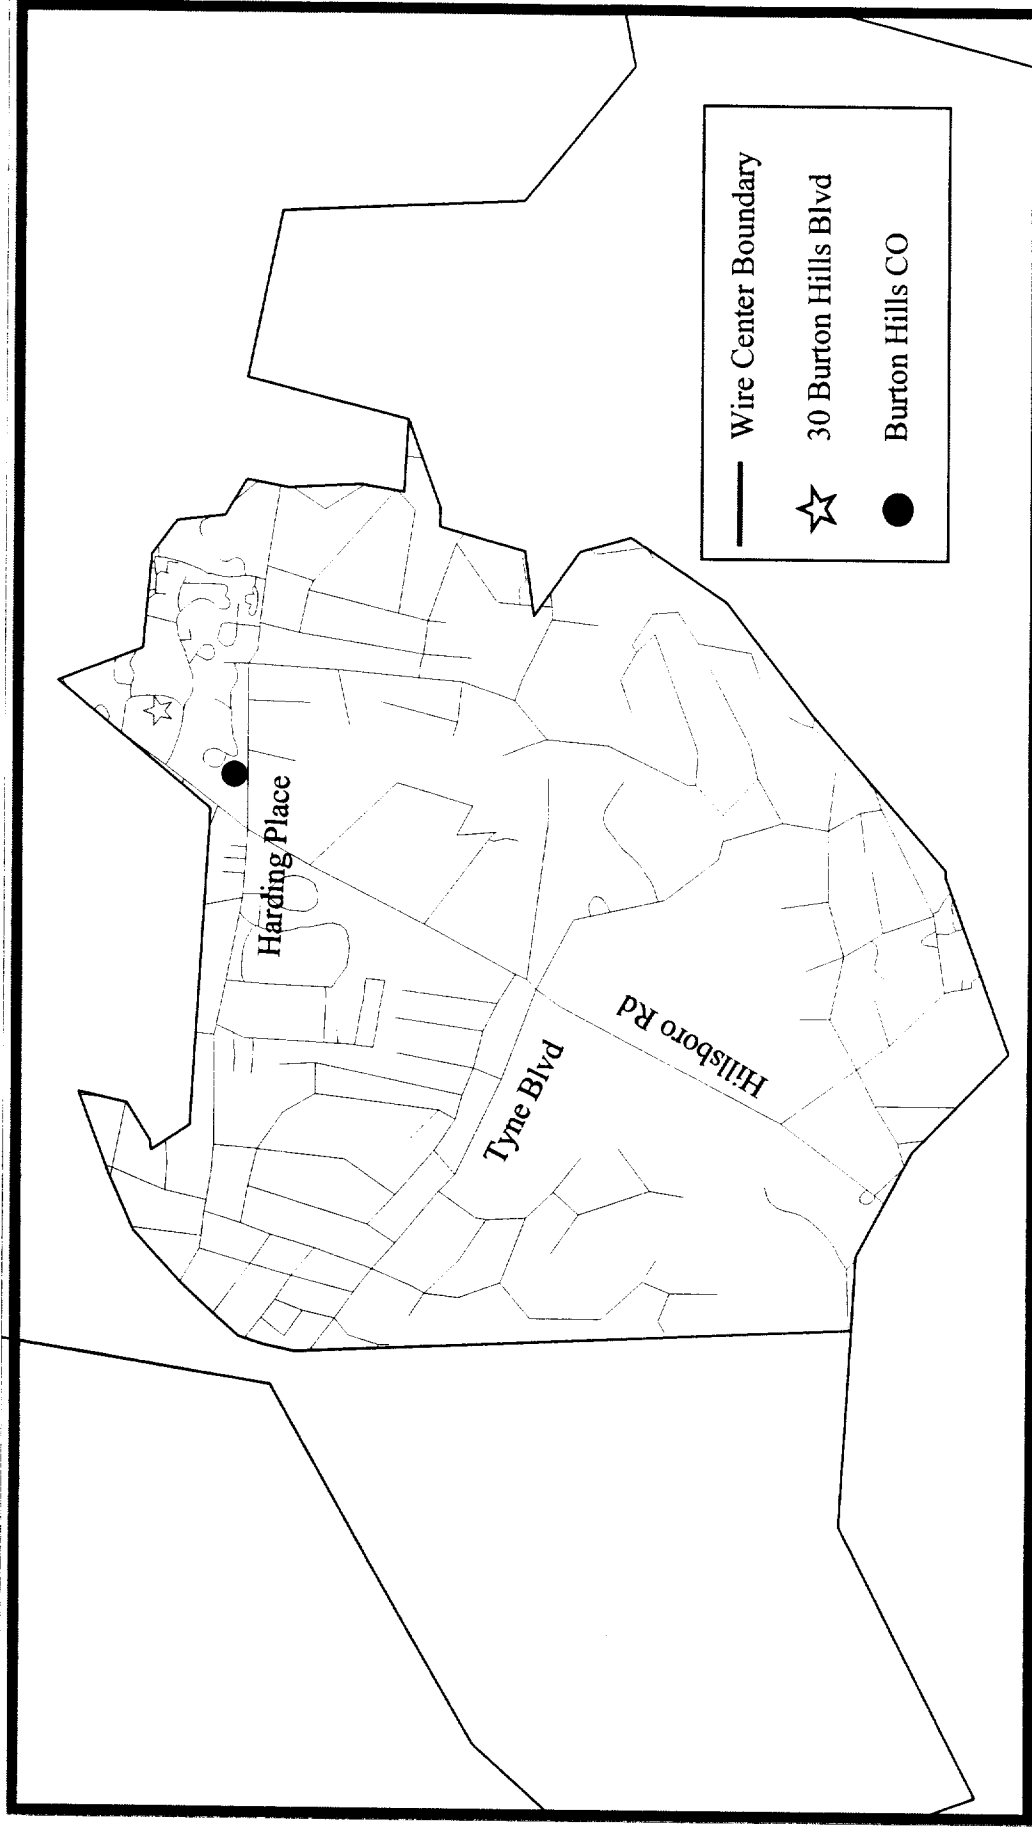

**RESPONSE:** Attachment 1 contains the engineering design of the loops serving Century 2 Staffing located at 30 Burton Hills, Nashville, Tennessee 37215. This design information also includes the identity of the central office which services this customer. Attachment 2 provides the geographic area served by the Burton Hills Wire Center which houses the Burton Hills Central Office. This Central Office is assigned the NPA/NXX of 615/665 and consists of a remote switching center.

BellSouth has previously provided NEXTLINK with information on this central office in a letter to Ms. Dana Schaffer, dated January 23, 1998. Further, this letter directed NEXTLINK to the NECA Tariff FCC No. 4 for questions regarding the type of central office in a wire center.

Ms. Dana Shaffer  
NextLink  
105 Molloy Street, Suite 300  
Nashville, TN 37201

Dear Dana:

This is in response to your verbal request of January 9, 1998, for a written response regarding BellSouth's position on providing expanded interconnection (collocation) in the Burton Hills central office in Nashville, Tennessee.

BellSouth offers physical and virtual collocation in compliance with Section 251(c)(6) of the Telecommunications Act of 1996 and the Federal Communications Commission's (FCC) Order released August 8, 1996, which includes guidelines for implementation of collocation by the Incumbent Local Exchange Carriers (ILECs).

In the FCC's September 2, 1993 Second Report and Order, paragraph 60, it states, in part, "...we (FCC) require LECs to provide an interconnection point or points as close as reasonably possible to the LEC location (i.e., central office, serving wire center, tandem, or remote node)." So, as far back as 1993, BellSouth has made collocation available in the required LEC locations. The Burton Hills central office is included as a BellSouth location available for collocation under the same requirements and guidelines as any BellSouth central office. Where space is not available to accommodate physical collocation, virtual collocation is offered. The Burton Hills central office is a small building and cannot accommodate physical collocation, however, virtual collocation can be accommodated at this time.

BellSouth's position regarding collocation is the same regardless of the type of switching system in use at a given central office. Central offices involving a remote switching system do not constitute a unique collocation arrangement. These types of central offices are identified with an RS as part of the last three characters in the Common Language Location Identification (CLLI) codes contained in the NFCA Tariff FCC No. 4.

I trust that the information provided satisfies NextLink's concerns regarding collocation in BellSouth's central offices. We will be glad to work with you through the collocation process for the Burton Hills central office.

Yours truly,

  
Donna Hartley  
BellSouth Account Manager

**REQUEST:** In your response to NEXTLINK Data Request No. 30, you state that the order of Burton Tally Insurance Agency was submitted after the closing date for the Nashville White Pages. Please produce all documentation related to any order submitted by BellSouth to BAPCO after 10/27/97 that was included in the most recent Nashville White Pages.

**RESPONSE:** The responsive data includes orders that were issued after the directory closing date of 10/27/97. The orders represented BellSouth, NEXTLINK and other LECs. BellSouth will make the requested information available for review at a mutually agreeable time and place.

## CERTIFICATE OF SERVICE
